

Tarcísio Girolardo

Senior Software Engineer

I'm a senior software engineer with over 6 years of experience across several types of business. Focused on React and it's ecosystem. Experienced in unit testing, React rewriting and refactoring apps and frontend performance. I'm also like to study new techs like Rust and Elixir. In my free time I like to spent time with my dog, family and friends

Employment

July 2022 – **Spocket**, *Frontend Engineer*, Canada - Remote.

- Present
- Working as Frontend Engineer using React and it's ecosystem (CRA, Next.js, using ES6+, React Hooks, React Query, Redux, Context API, Jest, RTL and our design system)
 - Maintained overall codebase, keeping all libraries updated
 - Developing new features following company's code standards and best practices. itaretaed through SCRUM from the board using Zenhub, Jira and Monday to manage
 - Refactoring old components to ES6+ (class components to functional components).
 - Created unit tests guide to help the team.
 - Developed new unit tests and improved the unit test percentage
 - Implemented a new CI/CD pipeline using Github Actions, AWS S3 and Cloudfront

April 2021 – **Dasa**, *Software Engineer*, São Paulo - Remote.

- July 2022
- Worked as Frontend Engineer with React (using ES6+, React Hooks, Context API, React Testing Library and Ant Design).
 - Developed new features and fixed bugs iterated through SCRUM from the board using Jira.
 - Refactored old components to ES6+(class components to functional components), improving the DX of our design system
 - Created a code standard based on the best practices community
 - Created new unit tests and improved the test coverage of the codebase to 80% (company standards)
 - Improved the CI/CD pipeline using Jenkins reducing problems and time on processing (30% decreased)

August 2020 – **Softwrap**, *Full Stack Engineer*, São Paulo - Remote.

- April 2021
- Worked with React and React Native, Node.js, Firebase and Docker
 - I was responsible to coordinate a specific team for the development of a hybrid application using React Native and Firebase for meal tickets from a disclosed company
 - Led a team of 3 developers
 - Helped and taught the less skilled developers
 - Created a pixel perfect React Native application for accountability of accounting firms

- February **SmartEnvios**, *Full Stack Engineer*, Ribeirão Preto.
- 2020 – June 2020
- Worked as Full Stack Engineer with React, Gatsby, TailwindCSS, Node.js, PostgreSQL, MongoDB and Docker
 - Created company's website using Gatsby and TailwindCSS
 - Developed crawlers using Node.js, Puppeteer and Cheerio for scraping and crawling.
 - Deployed on LightSail, uploading the exchange data to S3 and registering all operations in PostgreSQL.
 - The monitoring process was done using PM2 and the deploying of this related service.

Education

- 2012 – 2020 **BSc in Biomedical Informatics**, *Universidade de São Paulo*, Ribeirão Preto, São Paulo, Brazil.
- During my BSc in biomedical informatics I worked as a intern researcher in bioinformatics
 - Gained expertise in data analysis using R, more specifically ggplot2, tidyr, dplyr, bioconductor packages (like limma and GEOQuery), and the creation of dashboards using Shiny.
 - Also had classes such as Algorithm and Data Structures, Object Orient Programming, Databases and SQL, Machine Learning, Operating Systems and Distributed Systems.
 - Learn the basics of C, C++, Java and R.
